

ANKITA NADARGE

AI/ML Engineer | Kolhapur, Maharashtra | +91 9529203459 | nadargeankita4@gmail.com | [LinkedIn](#) | [GitHub](#)

CAREER OBJECTIVE

AI/ML Engineer with hands-on experience in NLP, deep learning, and LLM-powered applications. Built and deployed 3 end-to-end AI projects including a semantic resume screener (Sentence-BERT + Groq LLaMA 3) and an AI hydropower forecasting system (XGBoost + RAG). Seeking a role to apply practical ML skills in production environments.

EDUCATION

QUALIFICATION	INSTITUTION	YEAR	SCORE
B.Tech – CS & Technology	School of Engineering & Technology (Department of Technology) Shivaji University, Kolhapur	2022–Present	CGPA: 7.90
HSC (Class XII)	Shivaji Mahavidyalaya, Udgir	2020–2022	60.00%
SSC (Class X)	S.S. Madhyamik Vidyalaya, Sukani	2017–2020	93.60%

TECHNICAL SKILLS

Languages	Python, Java, SQL
ML / DL	Scikit-learn, TensorFlow, Keras, PyTorch, XGBoost, LSTM, CNN, XGBoost, Random Forest
NLP / AI	Sentence-BERT, LangChain, RAG, HuggingFace, Transformers, LLaMA 3, Groq API, NLP Pipelines, Semantic Search
Data	Pandas, NumPy, Matplotlib, Seaborn, Plotly, OpenCV
Databases	MySQL, PostgreSQL, Vector Database (FAISS)
Tools	Git, GitHub, Jupyter Notebook, Google Colab, Power BI
Deployment	FastAPI, Streamlit, Streamlit Cloud, Docker (basic)

INTERNSHIP

Labmentix Pvt. Ltd — Data Science with AI Intern

June 2024 – Sep 2024

- Worked on building machine learning pipelines from data preprocessing to model evaluation.
- Improved ML model accuracy by 12% through feature engineering and hyperparameter tuning using scikit-learn on real-world datasets.
- Developed Streamlit applications to display model results in a simple and interactive way.

PROJECTS

HydroGPT – AI-Based Hydropower Forecasting System

[Link](#)

Tech Stack – XGBoost, LSTM, SARIMAX, LLaMA 3, Groq API, RAG, FastAPI, Streamlit

- Trained and compared XGBoost, LSTM, and SARIMAX models on 10 years of hydrological data, using 14 engineered features to achieve $R^2 = 0.862$ without data leakage.
- Implemented a ReAct-based system that combines prediction, flood risk analysis, and RAG-based insights using LLaMA (Groq API).
- Built a no-code FastAPI + Streamlit platform enabling non-technical engineers to get forecasts and AI explanations through plain English.

AI Resume Screener – Semantic Job Matching System

[Link](#)

Tech Stack – Python, Sentence-BERT, Groq LLaMA 3, Streamlit, pdfplumber, scikit-learn, Plotly

- Built a semantic resume screening engine using Sentence-BERT embeddings to rank and match candidates against job descriptions based on contextual meaning with ATS-style multi-dimensional scoring.
- Integrated Groq LLaMA 3 to generate fit reports, interview questions, and resume improvement tips.
- Developed an ATS-style dashboard with skill-gap analysis, radar charts, and CSV export for smarter shortlisting.
- Deployed the project on Streamlit Cloud for real-time candidate screening.

Brain Tumor Classification using Deep Learning CNN

[Link](#)

Tech Stack – TensorFlow, Keras, NumPy, OpenCV, Streamlit

- Trained a CNN on 7,000+ brain MRI scans to classify 4 tumor types, achieving 95% test accuracy through targeted data augmentation and regularization.
- Engineered a full pipeline — preprocessing, augmentation, training, and evaluation — then deployed an interactive Streamlit app enabling real-time clinical inference from uploaded MRI images.

ACTIVITIES

C Programming Contest - Participant

2023

- Participated in a C Programming Contest conducted on Engineer's Day (15 Sep 2023) by the Department of Technology, Shivaji University, Kolhapur.

CERTIFICATIONS

- Python for Data Science, AI & Development – IBM
- Data Analysis & Visualization Simulation – Accenture
- Data Visualization Empowering Business – Tata Group
- Mastering DSA Using C and C++ – Udemy
